Copy & Paste

- ✓ Copy cell value to clipboard
- ✓ Paste value from clipboard

Lock / Unlock

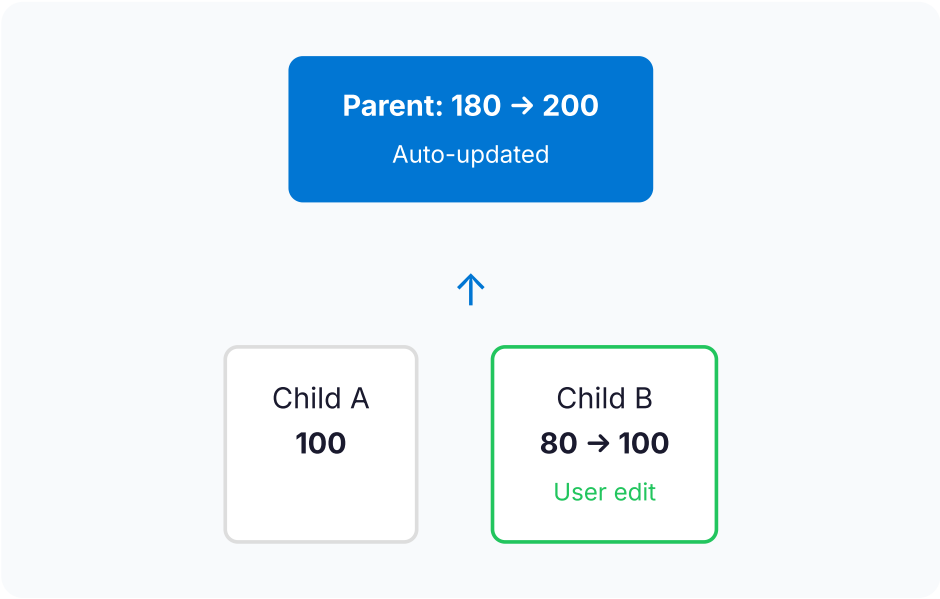

- ✓ Prevent cell from being edited
- ✓ Excluded from value propagation

Value Propagation

Automatic recalculation of parent/child values

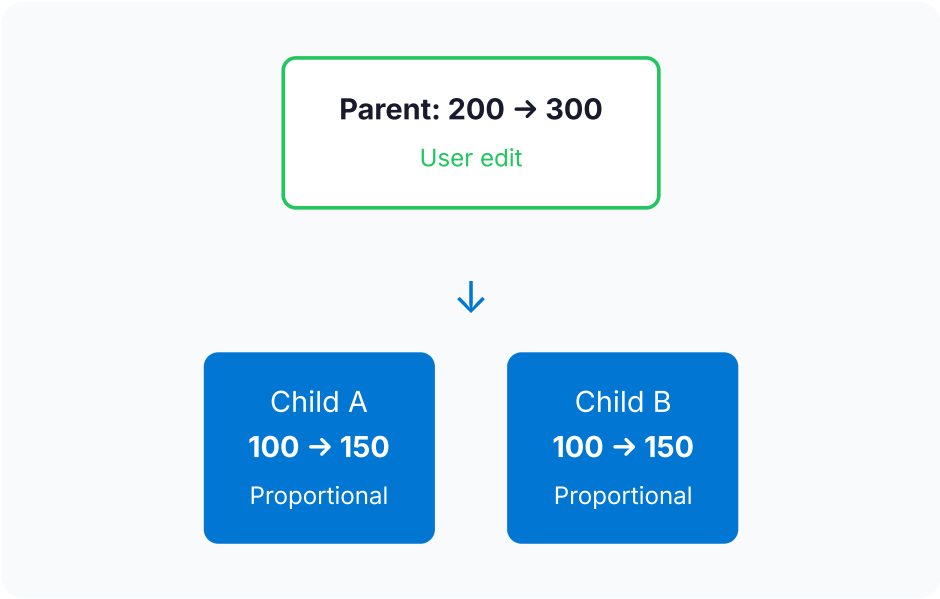

⬆ Upward Propagation

When you edit a child cell, parent totals automatically recalculate

⬇ Downward Propagation

When you edit a parent cell, children are proportionally adjusted

Locked cells are excluded from value propagation. When distributing values downward, locked cells maintain their value and the remaining amount is distributed among unlocked children.
